## 01 About

I'm a front-end developer who gets excited about **well-crafted, unique projects** — the kind where someone hands you a challenge and trusts you to build something that hasn't been done before. With **3+ years of experience** and **28+ projects** delivered for clients worldwide, I've learned that great web development is equal parts design sense and clean code. Currently studying Informatics at UITM Rzeszów, and looking for an internship where I can contribute and grow as part of a team.

## 02 Experience

### ● Front-End Developer

2023 - 2024

Dreamer Studio — Polish Web Agency

- Built multi-page corporate websites: QBL (20+ pages), Nations On Fire, Ski-Carv, and DreamApart.
- Translated Figma designs into pixel-perfect, fully responsive builds with custom scroll animations.
- Collaborated within an agency workflow, consistently meeting client deadlines.

### ● Freelance Web Developer

2022 - Present

Fiverr · UpWork — International Clients

- Delivered 28+ projects — landing pages, portfolios, e-commerce sites, and custom web applications.
- Managed the full project lifecycle: from gathering requirements to final deployment.
- Maintained clear communication with international clients, ensuring on-time delivery.
- Designed the VR Lounge website entirely from scratch — concept, layout, and code, no template used.

## 03 Education

### University of Information Technology and Management

2023 - Present

Bachelor's in Informatics · Rzeszów, Poland
